LOWER MAINTENANCE

CAN PERMANENTLY REPLACE PLASTIC
GUN IN PROPACK 30 OR 100

AVAILABLE WITH HOSE LENGTHS
FROM 7 FT. TO 100 FT.

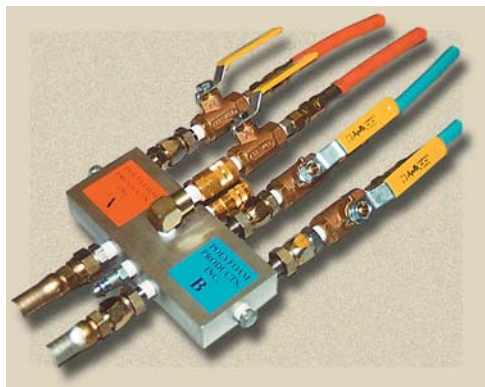

CAN BE USED WITH NEW
GEMINI MANIFOLD

Polyfoam, the pioneers of foam adhesive for tile roofing, introduces the development of a new generation of foam adhesive dispensing equipment. The new Airless™ and Gemini™ are designed to be used with Polyfoam's proprietary AH-160 foam roof tile adhesive.

The Airless™ system requires no compressor, is lighter, less complicated and costs less than the original air-driven equipment. It can be used with Polyfoam's disposable ProPack™ as well as refillable bulk cylinders. The Airless™ is designed to increase productivity and provide longterm reliable performance.

The Gemini™ system allows the applicator to use two foam guns from a single set of chemical tanks effectively doubling application capabilities. When used with Airless™ guns, the Gemini™ system costs the same as the original air-driven system. Existing air-drive guns can be converted to the Gemini™ configuration with the addition of 1/4-inch hoses and a chemical distribution manifold.
