

POLYSET®

ONE

Roof Tile Adhesive

Polyset® ONE is a single-component polyurethane adhesive specially designed to bond concrete and clay roofing tiles to approved underlayment substrates. The unique product properties, improved performance and professional dispensing unit give Polyset® ONE Roof Tile Adhesive many advantages over the use of traditional fastening methods such as mortar, nails, screws or other one-component adhesives.

Polyset® ONE Roof Tile Adhesive has an open time of approximately 4 minutes and contains no VOC's.

Because of the quick and easy application, Polyset® ONE saves materials and labor costs on new construction and repair work.

Polyset® ONE is available in 23 lb. cylinders with or without the reusable, solvent-resistant dispenser. Polyset® ONE is also available in 20 oz. cans.
